

Business Assessment

Operational & Digital Infrastructure Questionnaire

A structured questionnaire designed to assess operational challenges, digital infrastructure maturity, automation opportunities, reporting needs, compliance workflows, and future scalability.

1 Business Operations & Coordination

1. What are the biggest operational challenges your teams currently face on a daily basis?

Write your answer here...

2. Which processes currently consume the most time internally?

Write your answer here...

3. Are there operational activities that still rely heavily on manual work, spreadsheets, or messaging applications?

Write your answer here...

4. How do your teams currently coordinate projects, logistics, documentation, and operational updates?

Write your answer here...

5. Do you experience delays caused by fragmented communication between departments, partners, or external entities?

Write your answer here...

6. Is there currently a centralized system where management can monitor

operational activities in real time?

Write your answer here...

2 Documentation & Compliance

7. How do you currently manage operational documents, contracts, permits, reports, and approvals?

Write your answer here...

8. Do you face difficulties tracking document versions, approvals, or expiration deadlines?

Write your answer here...

9. Would a centralized digital document management system improve operational efficiency?

Write your answer here...

10. Are compliance and regulatory processes managed digitally or manually?

Write your answer here...

3 Logistics & Operational Visibility

11. Do you currently have real-time visibility over logistics, shipments, transport operations, or operational workflows?

Write your answer here...

12. Are there recurring issues related to delays, coordination, or operational tracking?

Write your answer here...

13. Would centralized operational dashboards improve internal visibility and decision-making?

Write your answer here...

4 Reporting & Management

14. How are operational and management reports currently generated?

Write your answer here...

15. Are management decisions supported by real-time operational data?

Write your answer here...

16. Which KPIs or operational metrics are most important for your business?

Write your answer here...

17. Would automated reporting and analytics reduce internal workload?

Write your answer here...

5 Automation & Workflow Optimization

18. Which repetitive processes would you most like to automate?

Write your answer here...

19. Are there approval flows or operational workflows that currently create bottlenecks?

Write your answer here...

20. Would automated notifications, reminders, or workflow tracking improve operational efficiency?

Write your answer here...

6 Multi-Country & Partner Coordination

21. Do you face operational challenges coordinating activities across multiple countries or jurisdictions?

Write your answer here...

22. How are suppliers, partners, and external operational entities currently managed?

Write your answer here...

23. Is communication and operational tracking between regional operations centralized?

Write your answer here...

7 Existing Digital Infrastructure

24. What software systems or platforms are you currently using internally?

Write your answer here...

25. Are there existing systems that you feel no longer support your operational growth?

Write your answer here...

26. Do your current systems integrate with each other effectively?

Write your answer here...

27. Are there areas where data duplication or operational fragmentation occurs?

Write your answer here...

8 Security & Infrastructure

28. Are cybersecurity, data protection, and operational access control important concerns for your organization?

Write your answer here...

29. Do you currently maintain centralized backups and operational security procedures?

Write your answer here...

30. Would cloud-based infrastructure improve accessibility and operational flexibility for your teams?

Write your answer here...

9 Future Growth & Scalability

31. Are there planned expansions or operational growth initiatives that may require stronger digital infrastructure?

Write your answer here...

32. Which operational areas do you believe require the most modernization?

Write your answer here...

33. What would an ideal digital operational system look like for your organization?

Write your answer here...

34. Are there specific operational pain points you believe technology could solve immediately?

Write your answer here...

10 AI & Advanced Technologies

35. Are you interested in AI-powered operational automation or intelligent analytics?

Write your answer here...

36. Would predictive analytics, automated reporting, or AI-assisted document processing provide value to your operations?

Write your answer here...

37. Are there operational decisions that could benefit from better data visibility and forecasting?

Write your answer here...

11 Final Discussion

38. If you could immediately improve one operational process through technology, which would it be?

Write your answer here...

39. Which areas of your business would benefit most from greater visibility and centralized coordination?

Write your answer here...

40. Are you currently exploring digital transformation or enterprise system modernization initiatives?

Write your answer here...
